Job Profile Summary

This position provides non-clinical, evidence-based peer support services, serves as a member advocate, shares coping skills, and provides recovery information for members. This position performs a wide range of tasks to assist with care coordination designed to assist members in regaining control over their own lives through individual recovery planning, wellness self-management, and strengthening resilience to improve personal health outcomes. This position will role model competency in recovery, resiliency, and wellness practices.

Job Description

- Assists in identifying recovery goals to help members realize improved personal health outcomes through shared decision making and health literacy/education activities.
- Provides information and support to assist members in effectively participating in developing a plan of care, engaging in team-based planning and facilitating co-creating of Wellness Recovery Action Plans (WRAP) and Peer Support Whole Health and Resiliency (PSWHR) as needed based on member's choice.
- Models and collaborates to develop problem solving techniques with members.
- Shares resiliency and recovery-oriented educational materials.
- Employs strategies to engage members who do not keep important follow-up appointments to identify barriers and obstacles and collaborate to find solutions.
- Meets members in inpatient settings and assist in identifying what lead to the crisis and in implementing relapse prevention strategies and assist in transitions from different treatment settings.
- Promotes community participation/inclusion as a strategy to prevent avoidable hospital admissions.
- Links members to community-based peer, parent, and family support services.
- Serves as champion and a resource for resiliency and recovery principles, strategies and tools.
- Documents all interactions according to company standards.
- Travels to meet members within the community.

Education Requirement:

High School Diploma/GED/Equivalent

Certification Requirement:

Certified Peer Support Specialist

Responsibilities Requirement:

- Must be a self-identified current or former user of mental health/substance abuse or co-occurring services who can relate to others who are now using those services.
- Must have a vehicle in good, working condition with the ability to travel within the field regularly.
- Working knowledge of Microsoft Office Product Suite.
- Knowledge of local system of services, resiliency and recovery principles and tools, such as wellness recovery action plans, wraparound process, and community-based peer, family and parent support organizations and services.
- Effective verbal and written communication skills.
- Ability to represent strengths and needs of consumers in clinical settings; must be able to draw from your own experiences.
- Ability to summarize and document findings in treatment plans.
- Must be able to work effectively and prioritize in a fast-paced environment in order to meet the demands of the organization.
- Understanding of wellness strategies, coping skills and collaborative process.
